

Job Title: Audio Technician (A2)**Terms: Contract****Salary: \$1,750****Requirements: 28-32 Work Days****Benefits: Travel, Meals, Housing****About the Role**

The A2 is an integral role for the Seattle Cascades. As the drum corps activity evolves, the consistent presentation of a balanced and blended ensemble mix is one of the core markers of success. The Cascades are seeking highly skilled Audio Technicians to ensure the maintenance and reliability of the complete audio system.

Responsibilities

- Ensure all points of the audio system are fully prepared and functioning
- Coordinate and deploy the use of wireless microphones
- Operate mixer scene changes in rehearsals and performances
- Be the first point-of-contact for membership and ensure performer's equipment is fully functional
- Implement mixer adjustments under direction of the Audio Lead
- Perform software, firmware, and hardware updates on all digital devices in the audio system as needed
- Repair or replace failed components within the system and/or communicate equipment needs efficiently to Audio Lead
- Monitor power supplying devices and regularly check wattage usage

Candidate Requirements

- Flexible and collaborative in the workplace
- Deeply experienced with Yamaha digital consoles (QL/CL/TF)
- Experienced with Shure wireless systems and Wireless Workbench
- Basic understanding of electrical engineering
- Basic understanding of networking: wireless network setup, static IP coordination
- Hands-on maintenance skills including soldering, cable building, cable management, rack installation
- Experienced with MainStage programming
- 21 years or older
